Let's Start!

It must have been terrifying!

Learning Outcome

Describe complicated or unusual events in the past through a wider range of B1 language in both work and social contexts.

Ask your partner:

- Have you heard of Count Dracula?
- What do you know about vampires?
- Do you believe in these legends? Why or why not?

Can Do Statements

- I can talk about strange events, sickness and problems.
- I can express possibility and certainty.
- I can talk about what was happening when something else happened.

Let's Explore!

Sally blogs about the Dracula Disease ... do you **believe in*** the legends?

* You often use the preposition "in" with the verb "believe".

Instructions: Read the text aloud.

I was watching the movie "Dracula" when I realized that there must be a reason that this legend exists. I decided to dig into the origins of Count Dracula. Most of us might have heard stories about Count Dracula. He is the famous, scary vampire that comes alive at night and sucks people's blood. The legend tells us that vampires have been around since the Middle Ages. While I was researching, I came across some information about a medical condition that one biochemist in Canada, David Dolphin, says may be the reason that vampire legends began.

Dolphin is an expert on a disease in the blood called "porphyria," a disease which causes problems in how red blood cells function. People with porphyria would not be able to go into the sun, or their noses and fingers could fall off. Their lips would also stretch back from their teeth and would make them look as if they had fangs. These days, people who are sick with porphyria can get blood transfusions and do not suffer from the problems of the disease. However, Dolphin believes that people in the Middle Ages may have drunk blood to get better.

People of the Middle Ages were also trying to protect themselves from anything that was different. Imagine seeing these scary-looking people at night! It must have been terrifying! It is no wonder that vampire stories began.

Should we feel sorry for vampires instead of frightened? What do you think?

Let's Practice!

It mustn't be easy to live with the Dracula disease!

Instructions: Read the sentences. Write the number of each sentence in the category they correspond to.

1. Most of us might have heard stories about Count Dracula.
2. A medical condition may be the reason why vampire legends began.
3. Seeing these scary-looking people at night must have been terrifying!
4. I realized that there must be a reason that this legend exists.
5. People with porphyria would not be able to go out in the sun, or their noses and fingers could fall off.
6. Dolphin believes that people in the Middle Ages may have drunk blood to get better.

Modals with the Simple Present tense

Modals with the Present Perfect Tense

Let's Practice!

Something happened in the past for these legends to exist today!

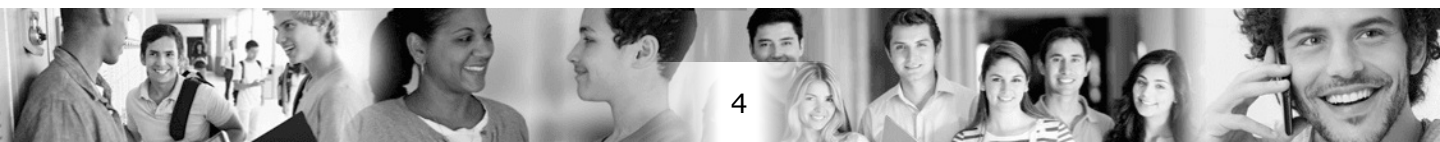

Instructions: Proofread the sentences. Identify and cross out the incorrect words. Write the correct words in the given space. Use capital letters where necessary.

1. Whaile I was researching, I come across some information about a medical condition that one biochemist in Canada, David Dolphin, says may be the reason that vampire legends began. _____
2. People of the Middle Ages was also tryng to protect themselves from anything that was different. _____
3. I watching the movie "Dracula" when I realizing that there must be a reason why this legend exists. _____
4. People with porphyria would not was able to go out in the sun, or their noses and fingers could fall off. _____
5. Imagine seeing these scary-looking people at night! It must been terrifying! It is no wonder that vampire stories began. _____

Let's Practice!

Extension Activity

Discuss a legend of the past with a friend.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Think of a legend that you and a friend know (or online go to europeisnotdead.com and read a legend).
- Tell the story of the legend. (Use past simple and past continuous where possible.)
- Talk about what was happening during the time the legend became popular.
- Talk about what people might have believed around the time that legend became popular.

Self-Assessment

Yes No

I retell a legend.

☐ ☐

I talk about what was happening when the legend was popular.

☐ ☐

I express possibility and certainty about what people might have believed.

☐ ☐

Target Words

- to dig into** (verb): to try to find information about something
e.g. I decided to dig into the origins of Count Dracula.
- legend** (noun): an old story about famous people and events in the past which may or may not have existed
e.g. The legends tell us that vampires have been around since the Middle Ages.
- to suck** (verb): to pull a liquid into your mouth using your tongue and cheeks
e.g. Vampires come alive at night and suck people's blood.
- biochemist** (noun): someone who studies chemical substances and vital processes that occur in living organisms
e.g. One biochemist in Canada gave a possible reason why vampire legends began.
- red blood cell** (noun): a cell in the blood of vertebrates that carries oxygen and carbon dioxide around the body
e.g. Porphyria is a disease that causes problems in how red blood cells function.
- to stretch back** (verb): to become tight by being pulled backwards
e.g. The lips of people with porphyria stretch back from their teeth and they look as if they had fangs.
- fangs** (noun): the long sharp teeth of an animal
e.g. Vampires have sharp fangs.
- lips** (noun): the two fleshy parts or folds forming the outside edges of the mouth
e.g. Their lips would also stretch back from their teeth.
- blood transfusion** (noun): the process of receiving blood into one's body intravenously
e.g. These days, people who are sick with porphyria can get blood transfusions.
- disease** (noun): an illness that affects people or animals, especially caused by infection
e.g. Porphyria is a disease which causes problems in how red blood cells function.

Learning Points

Modals for Possibility and Certainty

You use modal verbs to add meaning to other verbs. They come before the dictionary form (infinitive without 'to') of the main verb. Modal verbs can add meaning connected with certainty or possibility.

You can use modals with a variety of verb tenses. You can use them to talk about possible or certain actions in the present, past or future.

Modals have the same form every time regardless the subject. Do not add an -s to the infinitive.

You can use modals with the **Simple Present tense**:

*The medical condition **may be** the reason that the legend began.*

(Here, the modal may adds the meaning of possibility:

It is possible that the medical condition is the reason that the legend began.)

You can use modals with **have + past participle**:

*Most of us **might have heard** stories about Count Dracula.*

(Here, the modal might adds the meaning of possibility:

It is possible that most of us have heard stories about Count Dracula.)

*It **must have been** terrifying!*

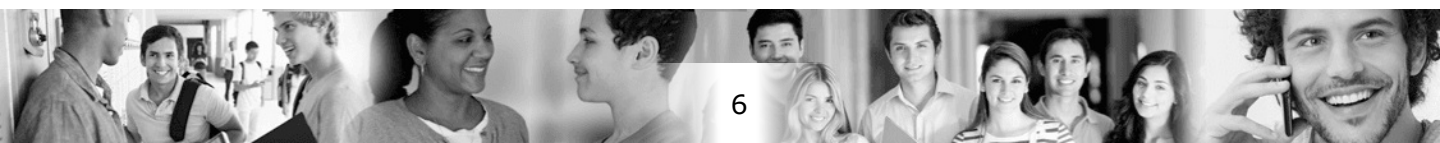

(Here, the modal must adds the meaning of certainty:

I am certain that it was terrifying.)

Modals have the same form every time regardless of the subject. Do not add an -s to the infinitive.

Examples:

- *Most of us might have heard stories about Count Dracula.*
- *I came across some information about a medical condition that one biochemist says may be the reason that vampire legends began.*
- *People with porphyria would not be able to go in the sun, or their noses and fingers could fall off.*
- *Dolphin believes that people in the Middle Ages may have drunk blood to get better.*

Learning Points

The Simple Past and Past Continuous Tense

You often use the Simple Past and the Past Continuous tenses together.

You can use the Past Continuous tense to refer to the context of a story. It talks about the 'background' action, or the longer, continuing action. You can use it to talk about an action that was in progress at a specific time in the past.

Examples:

*People of the Middle Ages **were** always **trying** to protect themselves from anything that was different.*

*I **was watching** the movie "Dracula" ...*

You can use the Simple Past tense to refer to a shorter action that happened in the middle of, or interrupted, the longer action.

Example:

*I **realized** that there must be a reason that this legend exists.*

Examples:

- *While I was researching, I came across some information about a medical condition.*
- *People of the Middle Ages were always trying to protect themselves from anything that was different.*
